

Company Profile

BureauEye Limited (BureauEye) was established in London in 2004 specifically to provide total business solutions to the Worldwide Intermodal transport industry. The company's original objectives remain unchanged, namely the development, supply and support of the highest quality computer application software possible for the industry.

The long term knowledge and experience of the company's founders, gained from working exclusively within this industry, has continually been enhanced and augmented by the addition of specialist analysts, programmers and support engineers, selected from within the international transport sector.

Company Status

BureauEye is consistently providing high quality products and services with levels of customer support that continue to win high customer satisfaction ratings from users throughout Europe, South Africa, North America and South America.

Customer Support

All BureauEye staff are dedicated to providing a complete range of customer support services.

These include:

- Consultancy & Project Management
- System Design, Evaluation & Integration
- 24 Hour Multilingual Customer Help Desk
- Website Development
- On-line (Hot Support) Remote Diagnostics
- Extensive User Training Options
- Comprehensive User Documentation

Product Range

The BureauEye range of products includes both Packaged and Customized Software solutions for operation on Personal Computer networks, stand alone or distributed processing systems, Hewlett Packard and UNIX based platforms. Currently the main products globally supported by BureauEye include:

beacon

A total IT solution for the management and control of Intermodal transport operations throughout the logistics chain.
